EXPERIENCE

Project based Frontend web developer

November 2021 – January 2022

Developing the frontend of an online educational platform:

- I was tasked with developing several pages of the website using Next js and Tailwind CSS.
- I refactored some codes to reduce redundancy in the codebase.

PROJECTS

Ecommerce app with Next js

Links:- [Github](#) [Website](#)

- Built an e-commerce website with Nextjs, MongoDB, Material UI and other recent technologies like Tailwind CSS.
- Created complex cart functionalities with context API and other react hooks.
- Deployed the project in vercel and vercel automated CI/CD.
-

Online Education Platform – Ment Me
